Bend-Sofa

DESIGNED BY PATRICIA URQUIOLA

It seems shaped by an artist but actually derives from a study of 3D models and digital research. It seems a monolith that has been shaped by subtraction, rounded and moulded by the designer. The irregular shape enhances comfort, the contrasting seams define the design and movement. Bend-Sofa combines manual skills and technology, solidity and strength, along with considerable flexibility in terms of use ensured by the extensive range of models.

Comes with:
one BSB - Bend Armrest Support
one B40C - Bend Cushion 24" x 15 3/4"
one B55C - Bend Cushion 24" x 21 1/2"

Charles

DESIGNED BY ANTONIO CITTERIO

The centerpiece of modern lifestyle, the Charles has become a hallmark in the world of design. The light feeling especially conveyed by the essential design of the “inverted “L”- shaped feet, along with a single seat-cushion and a series of free cushions placed on the backrest is the distinctive feature of a sofa that has met with boundless success. The airy shape and simple profile make it, almost by contrast, extremely rich and innovative from a spatial standpoint, a system that encourages the creation of ever new compositions.

Charles

DESIGNED BY ANTONIO CITTERIO

The concept behind the Charles is to have a high seat modular sofa with all the elements available in different forms, types and sizes. Linear and corner compositions have been developed with these elements in mind, especially for the chaise lounge end units. The Charles' peninsula-style compositions look especially beautiful as the centerpiece of a room. The single-seat cushion, the free pillows placed on the backrest and the pure lines of the die-cast aluminium feet give the Charles sofa a decidedly modern feel.

Harbor

DESIGNED BY NAOTO FUKASAWA

Naoto Fukasawa continues his research on upside-down truncated cone shaped seats, and, for this project addresses B&B Italia's need to explore the seating with armrests. Two forms are ergonomically designed and developed to obtain a relaxing easy armchair with a high back and headrest, and a conversation armchair with a low back. Charlotte by Antonio Citterio is a tribute to lightness. The shell is completely covered, but the frame profile is visible on the chair side, thus highlighting the line of the seat. The cover is in raw cut full grain leather.

The design allows both an erect and a more relaxed position by resting on one of the wings of the armrest. The formal balance results from the constant thickness of the body and by the profile of the seat, which is sinuous at the top and ends in the light steel frame. Its removable covers have metal zips on the back, which becomes a decorative motif.

Naoto Fukasawa, who favours the comfort of this product over the shape of the design, says, “I wanted the seat to look naturally comfortable, with the same shape relaxation would have if it were depicted with an image”. The wings - armrests - placed on the sides of the seat enhance the comfortable feel. They support both sides and back of the stool.

DESIGNED BY GABRIELE AND OSCAR BURATTI

A sheet of leather “pinched” in two places at the base: here is where the movement and natural inclination of the headboard originate. It has a comfortable and protective shape with remarkable formal simplicity and very thin sides marked by a lengthwise seam. The bed surface, which can be adjusted to two heights, has an effect of suspension and floating of the super-comfortable mattress.

Tobi-Ishi

DESIGNED BY BARBER AND OSGERBY

Edward Barber & Jay Osgerby first project for B&B Italia was Tobi-Ishi, a round dining table clearly inspired by Zen. The design duo are great enthusiasts of Japanese art and culture and the name and concept for this table came from the smooth stones (tobi-ishi) used as ornaments in traditional Japanese Zen gardens. The overhang of the table and the vertical trapezoidal bases set at right angles generate an essential sculptural figure that appears to change shape depending on the point of observation.

FABRIC

Exceptional weaves of linen, hemp and cotton allow us to make covers that become expressions of creativity and elegance. The material, the unique craftsmanship combined with traditional weaving practices, and the quality of texture and thread count combine to equal an unparalleled elegance. From the feel of the natural fibre to the richness of the visual appeal, these fabrics can turn any space into a place of well-being and relaxation. Discover the pleasure of being surprised by the beauty and taste of your home.

LEATHER

The skins selected by B&B Italia are obtained from European-bred calves. They are the best possible product for furnishings available throughout the world. The entire processing system is aimed at preserving the exceptional natural features of leather, including certain anomalies produced by the life of the animal, such as scars, abrasions, insect bites, etc. These characteristics are the tangible proof of the natural origin of the product and are the features that attest to the great quality of the leather. B&B Italia leathers are chrome-tanned and aniline-dyed; treatments that help preserve the natural qualities of the product. The exclusive tanning process allows us to obtain leather with an unmistakable softness that is very pleasing to the touch.

WOOD: A heritage to be protected

The indiscriminate use of wood and consequent depletion of the world's forests is slowly but surely becoming a thing of the past. In many areas of the world people are now aware that forests must be managed intelligently if wood is to be used as a raw material and balance the planet's oxygen needs at the same time. As a result, special resource maintenance and reforestation programs are being carried out in many countries. More and more, the only trees being cut down are the ones which have reached the end of their life cycle or whose continued growth could damage other trees. Companies such as B&B Italia recognize these environmental problems and obtain the majority of their wood from such sources. Finishing paints are made of solvents with very low toxicity and pollutant levels. Once polymerisation has occurred (hardening or drying) these paints do not leave behind any harmful substances. All paints used in the various application cycles are made using patented systems, exclusively for B&B Italia by the leading European manufacturers of wood paint. Authorized laboratories test all such treated surfaces to guarantee that they possess the optimum physical, mechanical and toxicological properties. Please note that the naturally finished surfaces of the types of wood listed above may change colour upon exposure to light.

Descriptions and pictures of products included in this catalogue have an indicative value only and are not binding for products' use. B&B Italia reserves the right to modify their products without prior notification.
